Receiving techs put the pet as RTG (means it does not have a hold at the time). Once it gets a hold, it gets changed to DADE, Or rescue or transport or whatever outcome. This will help us prioritize which pets get prioritized for surgery. All pets with holds get Priority for surgery.

Each excel sheet has a full week of surgery lists so the Techs in receiving can open according to due dates (an owner surrender would be put on the next day, but a stray would go on day 4)

This is how it looks once completed (after surgery)
